#### Why is this area being studied for annexation?

A request for annexation has been made to the Murfreesboro Planning Commission for a tract of land located along Rucker Lane. The annexation of this tract will result in an area not currently within the Murfreesboro City limits to be completely surrounded by the city. Therefore, the City of Murfreesboro is studying neighborhood study areas one and two. Neighborhood study area three was included in the study by the planning commission because of its location in relation to the southwest loop road. Studying an area for annexation does not necessarily mean the area will be annexed.

#### What is a plan of service?

In order to change municipal boundaries, the governing body of the municipality shall adopt a plan of services establishing at least the services to be delivered and the projected timing of the services. The plan of services includes police protection, fire protection, water service, electrical service, sanitary sewer service, solid waste collection, road and street construction and repair, recreational facilities and programs, street lighting, school impact and school zoning, and zoning services. This plan of service must include a reasonable implementation schedule for the delivery of comparable services in the territory to be annexed with respect to the services delivered to all citizens of the municipality. The next several pages are a copy of the preliminary Feasibility Study and Plan of Service in draft form. A final version will replace this copy when it is ready.

#### When can the public have an opportunity to speak?

The City of Murfreesboro will hold three neighborhood meetings at 7 p.m. in the Franklin Road Baptist Church Fellowship Hall. These neighborhood meetings will be on June 19, 2006, June 20, 2006, and June 27, 2006. The neighborhood meetings are designed to allow the public to get more information. This setting is intended to get any questions answered.

Three public hearings will later be held before the Murfreesboro Planning Commission in the Murfreesboro City Hall Council Chambers. The dates of the three public hearings are July 11, 2006, July 18, 2006, and July 25, 2006 and will begin at 7 p.m. The public hearings are in a more formal setting that gives each person an opportunity to speak to the planning commission for three minutes about their support or concerns in regards to the annexation.

# PRELIMINARY ANNEXATION FEASIBILITY STUDY AND PLAN OF SERVICES FOR PROPERTY EAST OF RUCKER LANE

PREPARED FOR THE
MURFREESBORO PLANNING COMMISSION
July 11, 2006

#### PLAN OF SERVICES FOR AN AREA EAST OF RUCKER LANE

#### **POLICE PROTECTION**

The Murfreesboro Police Department will begin providing services to the study area immediately upon the effective date of annexation.

#### FIRE PROTECTION AND EMERGECY SERVICE

The Murfreesboro Fire Department will begin providing fire protection by a full-time, professional fire department with more personnel, higher quality equipment, and a quicker response time than what the study area currently receives. Also available immediately upon the effective date of annexation will be a medial first responder service. The study area is currently receiving fire protection and ambulance service from a network of volunteer fire departments. It will take approximately 8 to 12 months for the city and CUD to install all the needed fire hydrants.

#### **ELECTRIC SERVICE**

The property is within Murfreesboro Electric Department's (MED) Service Boundary Agreement with Middle Tennessee Electric Membership Cooperation (MTEMC). MED will start planning to serve the entire area immediately upon annexation becoming effective. It will take approximately 1 year to integrate MED's service into the area.

#### STREET LIGHTING

According to MED, street lighting will be extended into the study area. It will take approximately 1 year for MED to accomplish this (see memo in Appendix B). The parcel wishing to develop will have streetlights extended as development occurs.

#### WATER SERVICE

There is a 16-inch Consolidated Utility District (CUD) water line along Rucker Lane that can serve the requested parcel's planned development, and will be the responsibility of the developer to extend.

The additional study area is mostly developed and already receives water service from CUD. Because this area is in CUD's water jurisdiction it will have the responsibility to upgrade water lines that have marginal fire flows.

#### **SANITARY SEWER SERVICE**

Sanitary sewer service is paid for by ratepayers and is not paid for with taxes. Therefore, any extensions of the sewer system are expected to be paid for by those who desire the service. Murfreesboro Water and Sewer Department (MWSD) currently has sanitary sewer available to serve the properties requesting annexation. As a companion to the development, the developer will be responsible for the extension of sewer service. Most of the parcels in the additional study area are served by septic systems, and MWSD has not received any plans to serve these properties.

#### STREETS AND ACCESS

The requested parcel has access to Rucker Lane, a community collector, Faithway Drive and Oak Drive, both county subdivision streets. The additional study area has access to numerous county subdivision roads, community collectors, and state highways. Any new roads associated with development of the property must adhere to the city's Standard Street Specifications.

The study area includes State Route 99, Rucker Lane, and the Southwest Loop, which are all on the 2025 Major Thoroughfare plan. It is the city's expectation that, when a property is developed, the owner or developer dedicate right-of-way and construct improvements or escrow funds as to be determined by the City Engineer that would provide for the improvements for any development adjacent to these roads. Gresham Lane, Old Salem Road and Windrow Road, all of which are existing county roads, are substandard and should be improved by the developer or escrow and right-of-way dedication should be required prior to development of any of the large tracts in this area.

#### **SOLID WASTE COLLECTION**

The city will begin preparing to provide weekly curbside solid waste collection service immediately upon the effective date of annexation, as well as brush/debris removal every 2 to 3 weeks. It will take approximately 6 to 8 weeks for the Solid Waste Department to receive the shipments of carts that will be distributed throughout the study area. The initial day of service for the study area will be Thursday.

#### **CITY SCHOOLS**

The Murfreesboro City School system serves grades kindergarten through 6th and is offered to students who are within the jurisdiction of the City of Murfreesboro. The subject area will be within the Scales Elementary school zone.

#### **RECREATION**

The annexation will have no direct impact on the City Recreation Department.

## PLANNING, ENGINEERING AND ZONING SERVICES

The property will come within the City's jurisdiction for planning and engineering immediately upon the effective date of annexation.

#### BUILDING AND CODES

The property will come within the city's jurisdiction for code enforcement immediately upon the effective date of annexation.

#### GEOGRAPHIC INFORMATION SYSTEMS

The property is within the area photographed and digitized as part of the city's Geographic Information Systems (G.I.S.) program.

# ANNEXATION FEASIBILITY STUDY FOR AN AREA EAST OF RUCKER LANE

# INTRODUCTION AND BACKGROUND

The area of interest in this feasibility study is colored in purple, blue, dark purple, and orange as indicated on this map. Current city limits are colored yellow. The total study area is approximately 1,970.83 acres, and includes 122.76 acres of requested study area and 1,848.07 acres of additional study area. Also included in the study are 7,693.29 linear feet (or 60.12 acres) of Interstate 24 right-of-way.

The applicant, Rowland & Rowland, has also requested a zoning classification of PRD (Planned Residential Development) for the subject parcel simultaneous with annexation. The property is within the City of Murfreesboro's Urban Growth Boundary.

#### **ZONING**

The property requesting annexation is presently zoned R-15 for residential purposes under the county zoning regulations. The developer has requested PRD (Planned Residential Development) zoning for the subject parcel simultaneous with annexation. This PRD will be a new development called Muirwood at Salem and will most likely consist of 324 single family detached houses on 113.5 acres.

3 of the parcels in the additional study area will be annexed into the City of Murfreesboro with an interim zoning of C-L. They are identified by the red color on the map. The zoning of 2 parcels is currently in question because they are awaiting approval from Rutherford County Planning Commission. The remaining area will be annexed into the City of Murfreesboro with an interim zoning of RS-15. The orange parcels on the map have either a conditional use permit or variance granted by the Rutherford County Board of Zoning Appeals. For more information on these properties see Appendix C.

## PRESENT AND SURROUNDING LAND USE

There are 1013 parcels in the total study area. The entire area has 967 single-family houses, 9 duplexes, the Salem Methodist Church, the Franklin Road Baptist Church, the Franklin Road Christian School, the Franklin Church of Christ, a CUD utility area, 2 commercial sites, and 28 unimproved parcels. The requested parcels are both unimproved. A cemetery is located in the additional study area south of Franklin Road. A Phillips 66 gas station is on Salem Pike. A portion of Interstate 24 is also included in the additional study area.

The city single-family subdivisions which surround the study area are The Villas and the Preserve at Indian Creek, Blackman Farm, Victory Pointe, Scottish Glen, Cason Crossing, Westview, Evergreen Farms, Salem Cove, Weston Park, and Belle Rive. The county subdivisions included in the study are Southern Aire, Parkway Estates, Country Park, Old South Estates and Old South Annex, Plantation South, Brownview Acres, Green Meadows, Paschal Franklin Heights, Haverford, Estates, Glenndale, Manson Manor, Deerfield & Deerfield Stables, High Meadow, Wickham Place, and Colindale. A section of Interstate 24 is also located in the study area.

#### **FUTURE LAND USE MAP**

The parcels which have requested annexation are within the *Salem Pike Study Area* and the area is recommended to develop into a medium density residential area with a greenway to the east of the property along Puckett Creek. The additional study area is in both the *Salem Pike Study Area* and the *General Development Plan for the Blackman Community*.

#### ANALYSIS OF CITY SERVICES

#### **POLICE PROTECTION**

The Murfreesboro Police Department will begin providing services such as patrol, criminal investigation, community policing, traffic operations, canine, DARE and other community crime prevention programs to the subject parcels immediately upon the effective date of annexation. The Police Department feels that in order to continue the current level of service 6 additional officers will be needed. A memo from the Police Department can be found in Appendix B. Additional costs to the department are expected and the formula for projecting this cost can be found in the memo.

#### **RECREATION**

No direct impact is expected to the Recreation Department for the annexation of these properties.

#### **ELECTRIC SERVICE**

Murfreesboro Electric Department (MED) will provide service to this area (please see memo in Appendix B). It will take approximately 1 year to integrate MED's system into the area. MED prefers the entire area be annexed because it will enable MED to avoid duplication of services. MED will compensate Middle Tennessee Electric Membership Corporation (MTEMC) for revenue that may be lost due to this annexation.

#### **STREET LIGHTING**

According to MED, street lighting will be extended throughout the entire study area. It will take approximately 1 year for MED to accomplish this (see memo in Appendix B). The parcel wishing to develop will have streetlights extended as development occurs.

#### **POPULATION**

968 single-family homes and 9 duplexes currently exist in the study area with an estimate population of 2,387 is located on the property. The proposed development will result in approximately 324 single-family homes with a projected population at full build out of 785 persons.

#### **CITY SCHOOLS**

The Murfreesboro City School (MCS) system serves grades kindergarten through 6th and is offered to students who are within the jurisdiction of the City of Murfreesboro. MCS has indicated that the subject property will be located within the Scales Elementary school zone (please see memo in Appendix B). As of this date, there are 493 school age children in the study area. 203 of those children are in grades k-6. The proposed development could add an additional 70 to 80 children. Scales Elementary currently has room for about 200 new children. Additionally, southwest Murfreesboro has several approved developments that are also zoned for Scales Elementary. MCS is currently looking for another school site to accommodate this growth.

#### **SOLID WASTE COLLECTION**

According to the Solid Waste Department (SWD), weekly curbside solid waste collection for the area will be available soon after the effective date of annexation, as well as brush/debris removal every 2 to 3 weeks (see memo in Appendix B). It will take approximately 6 to 8 weeks for the SWD to receive the carts that will need to be distributed to the existing homes. The study area will be served on Thursdays, which will result in shifting the day of service of other areas in the city. The cost of the carts that will serve the existing homes, churches, and commercial sites is \$87,035. The SWD will need an additional automotive side loader at a current cost of \$81,770. Initially, they will need 1 employee, at a cost of \$26,070. The total cost of equipment to serve the area is \$194,940.

#### STREETS AND ACCESS

The requested parcel has access to Rucker Lane, a community collector, Faithway Drive and Oak Drive, both county subdivision streets. The additional study area has access to numerous county subdivision roads, community collectors, and State Highways.

Access points and on-site circulation for future development will be reviewed during the subdivision review process, as new streets are platted. Any new roads associated with development of the property must adhere to the city's Standard Street Specifications.

#### PLANNING AND ENGINEERING SERVICE

The property will come within the city's jurisdiction for planning and engineering code enforcement immediately upon the effective date of annexation. As new development occurs, the Planning Commission will review all preliminary and final plats. Among other duties, the Planning and Engineering Department will inspect and monitor new construction of streets and drainage structures for compliance with the City's development regulations.

The Murfreesboro City Council will also be responsible for ensuring that this property will receive city services described in this plan. According to Public Chapter 1101 passed by the Tennessee Legislature, six (6) months following the effective date of annexation, and annually thereafter until all services have been extended, a progress report is to be prepared and published in a newspaper of general circulation. This report will describe progress made in providing city services according to the plan of services and any proposed changes to the plan. A public hearing will also be held on the progress report.

#### **BUILDING AND CODES**

The properties will come within the city's jurisdiction for code enforcement immediately upon the effective date of annexation. The City's Building and Codes Department will begin issuing building and construction permits and enforcing the codes and inspecting new construction for compliance with the City's construction codes immediately upon the effective date of annexation. The Building and Codes Department will also ensure that any new signs associated with the development of the property comply with the Sign Ordinance. No additional costs are expected. A preliminary inspection by the Building and Codes Department indicated there were numerous code violations in the additional study area. They include inoperable vehicles, substandard fences, substandard housing, substandard accessory buildings, open storage, and tall grass. The property at 4228 Higdon Drive does not have a pool barrier.

#### **GEOGRAPHIC INFORMATION SYSTEMS**

The study area is within the area photographed and digitized as part of the city's Geographic Information Systems (G.I.S.) program.

#### **FIRE PROTECTION**

According to a memo from the Fire Department dated May 18, 2006, this annexation will have no negative impact on the Murfreesboro Fire Department (MFD) (See Appendix B). The MFD will provide fire protection with a fulltime, professional staff as well as medical first responder service. Most all of the existing CUD water lines in the study area are able to provide adequate fire flows for fire protection on the subject property. The 6-inch water line on Gresham lane has insufficient water flow for firefighting purposes. The city will install 95 fire hydrants on 6-inch lines and 5 water hydrants on larger lines. The total cost for the fire hydrants will be \$231,000. The closest fire station to the study area is Fire Station 9, on Cason Lane. Currently the southern portion of the requested parcel is more than 5 roadway miles from fire station 9. The new fire station planned for this area will be within 5 roadway miles. All other parcels should receive ISO Class Three (3) fire protection.

The development of any site must provide adequate fire flows and install water lines and fire hydrants per the Murfreesboro Water and Sewer Department policies and procedures. Current guidelines recommend fire hydrants be 500' apart.

# REQUESTED PARCEL WATER SERVICE

The requested parcels are in the Consolidated Utility District (CUD) service area. The parcel which has requested rezoning, as seen on the map to the right, so as to develop a 346 single family lot subdivision, will bring their water service into the parcel from a 16-inch existing water line on Rucker Lane. This line is adequate for providing domestic water service and for maintaining the proper fire flows for the proposed development. It will be the responsibility of the developer to extend the water lines and to install fire hydrants.

All new water line development must be done in accordance with the development policies and procedures of the Murfreesboro Water and Sewer Department.

# ADDITIONAL AREA WATER SERVICE

The existing homes are currently served by the Consolidated Utility District (CUD) and no change in service will occur. Most of the parcels are currently being served by 6-inch water lines. 6 parcels that are on the cul-de-sac of Wickham Court are served by a 4-inch line. These lines are adequate for providing domestic water service and for maintaining the proper fire flows for the proposed development.

The parcels with development potential will be responsible to extend water service into the property. Any new water line development must be done in accordance with the development policies and procedures of the Murfreesboro Water and Sewer Department.

#### SANITARY SEWER SERVICE FOR THE REQUESTED PARCELS

Currently sanitary sewer is available to the property requesting annexation (See memo in Appendix B). The existing interceptor sewer is located toward the rear or eastern boundary of the property, as can be seen in the map to the right. This property is within the Overall Creek Sanitary Sewer Assessment District and will be charged \$1000.00 per single-family unit or its equivalent in addition to the current connection All sewer main improvements and fees. easements needed to serve the subject properties are to be installed and acquired respectively by developer in accordance with the development policies and procedures of the Murfreesboro Water & Sewer Department.

RUCKER LANE

# SANITARY SEWER SERVICE FOR THE ADDITIONAL STUDY AREA

Only a portion of the additional study area has existing sewer available. Sanitary sewer service is paid for by ratepayers and is not paid for with taxes. For that reason, extensions of the system are generally paid for by those who desire the service. At present MWSD does not have any plans to serve the properties in the additional study area that are currently on septic systems. Therefore, all of the existing homes will remain on septic systems. The future sewer improvements will be facilitated by the development of those parcels with developable potential.

Most of these properties are within the Overall Creek Sanitary Sewer Assessment District and will be charged \$1000.00 per single-family unit or its equivalent in addition to the current connection fees at the time of connection to the sanitary sewer. The few properties that are not within this district but will be served by an extension of the Overall Creek Interceptor Sewer will be charged these same fees.

MURFREESBORO WATER AND SEWER DEPARTMENT

ADDITIONAL STUDY AREA 3

#### **DRAINAGE**

According to information provided by the City Engineer, should any of the large undeveloped tracts develop, they may need to include detention and/or consent to drain with any future plans for these tracts. In addition, areas which drain to closed depressions should be considered to avoid negative impact from any future development plans. Permits from the State of Tennessee may also be required to modify any sinkholes impacted by future development

The existing subdivisions have anecdotal evidence which suggests concerns with the drainage systems within existing subdivisions. Engineering and Street Department staff will need to monitor drainage patterns and conditions of existing systems in an effort to address any deficiencies. Coordination with the County Public Works Department will also be necessary.

The red lines on these maps represent 10 foot contours. The black lines are 2 foot intervals.

#### FLOODWAY AND FLOODPLAIN

Puckett Creek is a FEMA studied stream and located in the study area, therefore some of the properties area within the 100-year floodplain and floodway as delineated by the Federal Emergency Management Agency (FEMA).

Development designs should maintain existing water flow patterns insofar as possible. Approximately 77 acres of the 113.5 acres of requested area is overlain in silty-loamy soils, which may offer good opportunity for infiltration of stormwater and a corresponding minimization of runoff volume. The MWSD requests this feature be incorporated into

#### TAXES AND REVENUE

The first city tax bill for all property annexed during the calendar year of 2006 will be due on December 31, 2007. City taxes are calculated upon the property appraisal and assessment of the Rutherford County Property Assessor's Office. The current tax rate for the City of Murfreesboro is \$1.72/\$100.00 assessed value. Residential property is assessed at a rate of 25% of its appraised value and commercial property is assessed at a rate of 40% of its appraised value. Table I, which is below, shows the total estimated taxes that may be expected if annexation of the entire area were approved. Table II located in Appendix C shows individual assessments and estimated city taxes that would be collected, if the property were to be annexed in its present state with the 2005-2006 tax rates.

Table I
Total Estimated Taxes from Site

Owner of Record	Acres	Land Value	Improvements Value	<b>Total Assessment</b>	<b>Estimated City</b>
					Taxes
Entire Study Area	1,971	\$30,807,097	\$100,024,299	\$128,092,934	\$547,123

These figures are for the properties in their current state. Properties with Greenbelt status receive significant tax savings. Annexation does not affect the Greenbelt status of the property. When the property is removed from the Greenbelt tax rolls, the owner must pay three years of roll back taxes.

The following section intends to project the amount of property tax revenue for the city as a result of the annexation and development of the requested property. It should be noted that the projections are general and are not meant to be exact. While it is impossible to determine the exact amount of taxes that will be generated by the development of this parcel, knowing the average housing value for the residential areas will help to project a figure.

According to Bill Rowland, the average parcel value with improvements for the 12,150 square foot lots is \$337,500, the 8,800 square foot lots is \$250,000, and the 7,875 square foot lots is \$200,000; this would generate approximately \$369,585 in annual property tax revenue for the city from the development with full build out.

The City of Murfreesboro is also projected to receive additional revenue from state-shared taxes. Table II below shows the 2006-2007 per capita state revenue estimates for the City of Murfreesboro.

<u>Table II</u> Per Capita State Revenue Estimates

General Fund	Per Capita Amount				
State Sales Tax	\$71.39				
State Beer Tax	\$0.52				
Special Petroleum Products Tax (Gasoline	\$2.20				
Inspection Fee)					
Gross Receipts (TVA in-lieu taxes)	\$7.00				
Total General Revenue Per Capita	\$81.11				
State Street Aid Funds	Per Capita Amount				
Gasoline and Motor Fuel Taxes	\$28.49				
Total Per Capita (General and State Street	\$109.49				
Aid Funds)					
Total State-Shared Revenues (based on	<i>\$347,193</i>				
full build-out of <i>Muirwood</i> and the					
additional study area)					

The per capita state revenue estimates apply only to new residents and will only be available after a certified census takes place. Adding the state-shared revenue projections to the property tax revenue projections equals annual tax revenues of \$1,262,796.

#### **SUMMARY**

All services should be available within one year of the annexation becoming effective. The developers have the responsibility of extending the services into those parcels with development potential. The entire study area, approximately 1,970.83 acres, includes 122.76 acres of requested study area and 1,848.07 acres of additional study area. Also included in the study is 60.12 acres of Interstate 24 right-of-way.

Currently the study area contains 368 single-family houses 9 multi-family units. The area also has churches, a school, and commercial uses. Annexation of land prior to development is preferable to annexing previously developed land. The study area is contiguous with the current city limits. All parcels are within the city's Urban Growth Boundary.

Rowland & Rowland Investments, LLC submits this annexation and Planned Residential Development zoning classification request for the Muirwood Neighborhood on property they own off of Rucker Lane, south of the current City Limits. The property is referenced by Tax Map 115 Parcel #11.00 and also, Record Book 51, Page 281. The property is presently zoned Residential-15 (R-15) under the jurisdiction of the Rutherford County Regional Planning Commission. Property in the northeast quadrant includes the Southern Aire residential development (R-15) and the Evergreen Farms neighborhood zoned PRD in the City. The property in the southeast quadrant is zoned R-15 in the County. The property to the west is the recently approved Marymont Springs PUD.

As planned, the neighborhood comprises 112 acres of property and would contain 346 single-family detached lots. The plan proposes a combination of 90', 80', and 75' lots with a minimum square footage of 1,700 square feet for the 75', 1,800 square feet for the 80' lots, and 2,400 square feet for the 90' lots. The plan also proposes sidewalks along both sides of the street and 306,000 square feet or roughly 7 acres of open space located in the strategic locations throughout the neighborhood. Homes in the neighborhood will be a minimum of 75% masonry construction.

Our objective in seeking the Planned Residential classification is to allow for a variety of lot sizes and flexibility in the development design that promotes the efficient use of the property and allows us to create a neighborhood that is pedestrian friendly with masonry homes with primarily rear and side entry garages with approximately 30% including 3-car or 2-car expanded garages.

#### **MEMORANDUM**

TO: Margaret Ann Ely

FROM: Chief Glenn Chrisman

**DATE:** May 17, 2006

SUBJECT: Annexation Request and Addendum for Property East of Rucker Lane

The annexation request and corresponding addendum for property located east of Rucker Lane will have a significant impact on the Murfreesboro Police Department.

In order to continue the current level of service we provide to City residents, we would need to increase our staff by six (6) officers to serve these additional nine hundred thirty-seven (937) existing homes.

This projection is based on an estimate of 2,267.5 residents (937 homes multiplied by 2.42 persons per home<sup>1</sup>). This number of residents is then multiplied by 2.6 (target ratio of fulltime law enforcement officers per 1,000 residents<sup>2</sup>) to arrive at a staffing level of 5.89 officers, which has been rounded to six (6) new officer positions.

We are hopeful that the manpower need could be addressed in the current budget year.

I respectfully request proper access for emergency vehicles be included in the development of this property from Rucker Lane to include proper left turn lanes and improvements of the roadway surface conditions if necessary. Please keep me informed as developments or changes become effective and provide a legible updated map of the additional study areas showing addresses if this annexation request is approved. This property is located in **Police Zone # 114.** 

If you have any questions, please contact my office.

## **MEMORANDUM**

DATE: May 18, 2006

TO: Margaret Ann Ely

FROM: Ken Honeycutt, Fire Marshal KH

SUBJ: EAST OF RUCKER LANE ANNEXATION

The Murfreesboro Fire Department can provide fire protection to this annexation request, however a portion of this property may not receive an ISO class 3 rating because our nearest fire station located on Cason Lane is more than five road miles away. Fire flow

requirements and access must be provided as this area is developed. The additional study areas can also be provided fire protection. Currently these additional study areas are being provided fire protection by one of the Rutherford County volunteer fire departments. If annexed the Murfreesboro Fire Department can provide a full time paid professional fire department with a faster response time, medical first responders, more personnel, and better equipment. The additional study areas have several issues to be considered before annexation. First is fire protection, approximately one hundred fire (100) hydrants must be installed. These hydrants will be installed according to the Murfreesboro Water and Sewer Department guidelines for residential areas but are located in CUD's water district. The cost of these hydrants range from twenty three hundred dollars (\$2,300) each to twenty-five hundred dollars (\$2,500) each, depending on the size water line that must be tapped. The majority of these hydrants will be installed on a six-inch water line, which cost twenty-three hundred dollars (\$2,300) each. Second, Consolidated Utility has indicated that the installation will take eight months to one year to complete. Third, an area along Gresham Lane was found to have insufficient water flow for firefighting purposes. Mr. McElroy of Consolidated Utility District indicated to me that they have plans to replace the existing six-inch water line in that area to a twelve-inch water line, which should improve the water flow for firefighting purposes in the near future. If you have any questions please call me at 893-1422.

## *MEMORANDUM*

Date: May 15, 2006

To: Margaret Ann Ely – Planning Department, City of Murfreesboro

From: Mark Kimbell - Chief Engineer, MED

RE: Annexation Progress Report

Rucker Lane & Gresham Lane Area

Murfreesboro Electric Department submits the following information on the availability of electricity in the vicinity of the above subject annexation.

Property is inside MED's Service Boundary Agreement with MTEMC. Although the scope of this annexation and study areas are large, the annexation will work to MED's favor. Consolidation and avoiding duplication of services with MTEMC can only be accomplished by annexing this large area. MED is strongly in favor of this type of annexation. MED will pay MTEMC approximately \$1,000,000 for existing facilities and approximately \$2,000,000 over a 10 year period for customer lost revenue for the 1000+ customers under our territorial agreement.

Integration into MED's system will take approximately one year. City streetlights will be installed as MED begins to take over the lines from MTEMC and serves areas of the annexation.

If you have any further questions, please call me at 494-0424, or e-mail me at MKimbell@MurfreesboroElectric.com.

Pc: Larry Kirk – General Manager, MED

Joseph Aydelott – City Planner, City of Murfreesboro

# *MEMORANDUM*

DATE: May 23, 2006

TO: Margaret Ann Ely

FROM: Valerie Smith, PE

RE: Annexation Request for Property

Along Rucker Lane.

Pursuant to your request of May 12, 2006 we submit the following information on the availability of water, sanitary sewer and storm water quality in the vicinity of the subject annexation:

## WATER LINES

All of the area shown to be annexed and studied is within Consolidated Utility District's service boundary.

## **SEWER LINES**

## Requested Area

Currently sanitary sewer is available to the property requesting annexation. The existing interceptor sewer is located toward the rear or eastern boundary of the property as shown on the attached drawing. This property is within the Overall Creek Sanitary Sewer Assessment District and will be charged \$1000.00 per single-family unit or equivalent in addition to the current connection fees. All sewer main improvements and easements needed to serve the subject properties are to be installed and acquired respectively by the Developer in accordance with the Development Policies and Procedures of the Murfreesboro Water & Sewer Department.

## Additional Study Areas #1, #2 & #3

Only a portion of these additional study areas have existing sewer available as shown on the attached drawing. I have attached separate drawings for each area. All of the existing homes, whether they are within existing county subdivisions or not, will remain on septic systems. The sewer will be extended by the developer as development occurs for the larger tracts that can be developed. Most all of these properties are within the Overall Creek Sanitary Sewer Assessment District, as outlined on the drawings, and will be charged \$1000.00 per single-family unit or equivalent in addition to the current connection fees at the time of connection to the sanitary sewer. A few of the properties within study area #1 are not within this district however, should they be served by an extension of the Overall Creek Interceptor Sewer they will be charged these same fees.

All sewer main improvements and easements needed to serve the subject properties are to be installed and acquired respectively by the Developer in accordance with the Development Policies and Procedures of the Murfreesboro Water & Sewer Department.

At such time sewer is planned to be extended and off-site sanitary sewer easements are required, an agreement to execute sanitary sewer easements between the Developer and the Grantor must be provided to the Department prior to our department reviewing construction drawings.

#### STORM WATER QUALITY

Development designs should maintain existing water flow patterns insofar as possible. Approximately 77 acres of the 113.5 acres of Map 115/Parcel 11.02 is overlain in silty-loamy soils, which may offer good opportunity for infiltration of stormwater and a corresponding minimization of runoff volume. City requests this feature be incorporated into designs.

## Ms. Ely:

In response to your e-mail to Mike Snell regarding areas being studied for annexation the following information was acquired:

Sent: Thu 5/25/2006 10:19 AM

Area 1 (Purple): Total K-12 students: 229 (K-6 students: 94)

Area 2 (Blue): Total K-12 students: 257 (K-6 students: 104)

Area 3 (Orange): Total K-12 students: 7 (K-6 students: 5)

NOTE: This information was collected as of May 24, 2006.

If you have any questions, feel free to contact me.

Thank you!!

## INTER-OFFICE MEMORANDUM

**DATE:** May 31, 2006

**TO:** Margaret Ann Ely, Planner

**FROM:** Chris Griffith, City Engineer

**SUBJECT: Annexation Request for Property East of Rucker Lane** 

In response to your memo dated April 28, 2006 and your Addendum dated May 12, 2006, we have reviewed the topographic map of the study area and offer the following comments:

## Drainage

1. <u>Large undeveloped tracts</u>-detention and/or consent to drain should be included with any future plans for these tracts. In addition, areas which drain to closed depressions should be considered to avoid negative impact from any future development plans. Permits from the State of Tennessee may also be required to modify any sinkholes impacted by future development.

2. <u>Existing subdivisions</u>-anecdotal evidence suggests concerns with the drainage systems within existing subdivisions. Engineering and Street Department staff will need to monitor drainage patterns and conditions of existing systems in an effort to address any deficiencies. Coordination with the County Public Works Department will also be necessary.

### Streets/Major Thoroughfare Plan

The study area includes State Route 99, Rucker Lane, and the Southwest Loop, which are all on the 2025 Major Thoroughfare plan. Dedication of R.O.W. and escrow for road improvements will be required for any development adjacent to these roads. In addition, several existing county roads such as Gresham Lane, Old Salem Road and Windrow Road are substandard and should be improved by the developer or escrow and R.O.W. dedication should be required prior to development of any of the large tracts in this area.

Please contact me if you have any additional questions.

Subject: Annexation of Property East of Rucker Lane

This is in response to your request dated April 28, 2006. The annexation and the study areas would all impact Scales Elementary School. The additional students that could be expected from the new annexation (Muirwood) could be between 70 and 80 children. The additional children from the other study areas are difficult to estimate because one would assume that most are currently attending a county school. If the areas were to be annexed, it is not known how many would choose to remain in a county school, or even if they would be permitted to remain. Strictly using the formula used for new developments, the number would be approximately 200 children.

Scales Elementary currently has room for approximately 200 new children. However, its zone has approximately 10,000 additional RDU's that are either planned or permitted. We are currently looking for another school site in southwest Murfreesboro to accommodate this growth.

Please let me know if you need further information.

Memorandum

To: Margaret Ann Ely, Planning

From: Joey Smith, Solid Waste

Date: May 2, 2006

Subject: Annexation request for property east of Rucker Lane

The 122.76 acres, that is requesting to be annexed as PRD will not be a problem for the Solid Waste Department for service. Our service day in that area is Thursday. Please note that due to the price of fuel that a new cost for carts has gone from \$55.00 to \$65.00 per cart. This is the new price of carts that is purchased by the City for the residents. The cost for these carts (346) will be \$22490.00.

## The Additional Study Area 2: South of Highway 96

The Solid Waste Department has concerns on the main road going into the study area 2 and the annexation request area. Rucker Lane is narrow and heavily traveled. Also there are several dead end streets in these existing subdivisions. Fairview Road, Country Park Lane and Confederate Road all dead-end into acreage that has been annexed into the City of Murfreesboro, are there any plans to have the streets extended into these subdivisions? In both study areas the cul-de-sacs are going to be a challenge to maneuver the Solid waste vehicles. The Study area 2 will be serviced on Thursdays.

## The Additional Study Area 1: North of Highway 96

At the present the homes north of Highway 96 the day of service is on Thursday. If this annexation were to precede this area along with these City of Murfreesboro subdivisions (Blackmon Farms, Blackmon Cove, Blackmon Grove, Long Cove, Wilkerson Trace, Preserve at Indian trace and Victory Point), will be moved to Friday. The biggest problem for the Solid Waste department will be the road where Braxton Bragg and Campfire Trail meet in behind the Franklin Heights Church. The Solid waste Department will have to service three homes that dead end on Campfire Trail and turn around in the church lot or back up into Braxton Bragg.

Both study areas are different in that homes are already built. The Solid Waste Department has budgeted for the normal growth due to new construction for carts. However, the Solid Waste Department has not budgeted for an additional 947(Solid Waste Count) carts for ready homes. The Solid Waste Department would have to ask the Mayor and Council for approval of two additional truckloads of carts for this annexation. This annexation will require an additional automative side loader. The carts will cost \$81,770.00. This is for two full loads of carts, no partial shipment. The

lead-time for carts is 6 to 8 weeks. The cost of a new side loader is \$240,0000.00. The lead-time for a truck is 6 months. No additional knuckle boom trucks will be needed for the pick up of brush in this new area. The Solid Waste Department asks that if these areas are annexed into the City of Murfreesboro that it does not take place until the first quarter of 2007 (March 2007). This will allow for the rerouting of both Thursday's and Friday's garbage and brush collection and allow time for information packages to be sent to the residents in both study areas as to the solid waste pick up and collection. The Solid Waste Department will be able to build and deliver the carts to these new residents. However, there will be overtime and shifting of manpower to deliver these carts.

In my tenure this is the first time that this many existing homes is included in an annexation request. In addition to the information packages that will be sent to the residents, signage should be placed at the new service areas for service days. While surveying both study areas these residents have multiple collection days of solid waste. For at least two to three weeks if this annexation were to take place signs should be posted at various places within the subdivisions simply stating garbage pick up by the City of Murfreesboro's Solid Waste Department is Thursday or Friday. The Solid Waste Department did not include in its budget any additional monies for postage or advertising for this many additional homes. Estimated cost for the signs is \$750.00 and additional postage is \$400.00.

Margaret, thank you for allowing the Solid Waste Department input into the growth of the City of Murfreesboro. If you have any questions please call.

## Memorandum

To: Margaret Ann Ely, Planning

From: Joey Smith, Solid Waste

Date: May 16, 2006

Subject: Additional study area 3 for the proposed Annexation request for property east of Rucker

Lane

The additional study area 3 will no pose a problem for the Solid Waste Department to service. It would all be rolled into the bigger picture. The residents in this study area day of service would be on Thursday. The cost of the additional carts at \$65.00 per cart would be \$3,185.00. The additional equipment would that would be purchased for the whole annexation will be sufficient for the task.

Margaret, thank you for allowing the Solid Waste Department input into the growth of the City of Murfreesboro. If you have any questions please call.

From: Joey Smith Sent: Tue 6/6/2006 11:57 AM

To: Margaret Ann Ely

Subject: RE: new employees for Rucker annexation?

One driver will be needed for this annexation. The cost for this employee yearly will be \$26,069.80. This would be for the start up alone. When construction is completed depending on the zoning and land use this 1 person will eventually grow into 2 or more alone with additional vehicles and carts.
